Art Unit: 2815

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 62-81 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no antecedent basis for claiming "less than $10E17/cm^3$ ". The original disclosure does not describe such structure. It is unclear what is intended by such limitations. In a previous response applicant states that examples 10 and 14 support such structure, however, neither the claimed language nor any support for the claimed language is seen. Clarification is required as a perusal of the entire original disclosure does not show support for the claim language.
